DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1, 5 and 6 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Healy (5,678,258) in view of Fan (5,749,552).

Healy discloses a shower arrangement comprising a hollow wall bar (17) running parallel to a wall surface and capable of fixing a hand shower at valve (34), wherein the hollow wall bar is connectable at one end of the hollow wall bar via a water carrying wall connection (16, 25) to a wall water supply, and wherein the hollow wall bar comprises at the other end of the hollow wall bar at least one shower coupling (about 34) such that the shower coupling is supplied with water through the hollow wall bar. The wall bar (17) is adapted to carry shower heads and other shower accessory such as soap tray. The arrangement further comprises at least one adjustable shower (21 or 22) supplied with water through the hollow wall bar. Although the shower arrangement of the Healy reference does not include a sliding holder for carrying a hand shower and shower hose connecting to the hand shower as claimed, attention is directed to the Fan

reference which discloses an analogous shower arrangement which further includes sliding holder (52) on a war bar (56') for attaching a hand-held shower head that is connected to a supply via a flexible hose (50). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to employ, on the Healy wall bar (17), other shower accessory such as a hand-held shower and sliding holder as, for example, taught by Fan in order to provide a movable shower head that allow the user remove and wash the hard to reach area of the user's body.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
